#### TEAM PROJECT

#### **Fitness Studio MERN-Project**

Active Link | Browser-side-Script | Server-Script

Time period: 2 months

Technology: Node js | Express Js | Firebase | React Js | MongoDB | Material UI | Redux | Socket io

#### My Contibution:

- Demonstrated proficiency in Git and GitHub collaboration by performing full Git merges and commits within the project repository.
- collaborate with team members to integrate Fitbit and Strava API data into the "trekking progress" section, providing users with dynamic and personalized activity tracking.
- Led the development of the "Daily activities" section, leveraging Redux for state management and backend data integration to track user fitness metrics and goals.
- Enhanced the goal-tracking feature by allowing users to set, update, and track weight management goals, contributing to a more comprehensive user experience.

#### EDUCATION

# **Diploma in Engineering**

Feni Polytechnic Institute • 2020-Present COMPUTER DEPARTMENT

#### CERTIFICATIONS

### **Complete Web Development**

Programming-Hero • 2023-2024
